Starting today, I'm launching Learn to Create, which allows anyone to create beautiful images in the digital darkroom. With this free platform, you can learn how to turn your images into prints, gift cards, and decals via a series of video tutorials. The video tutorials run just under an hour each to teach you the fundamentals. With Learn to Create, you can start creating immediately, as the first few tutorials will give you a sense of how the system works. But if you get stuck or want to get a deeper understanding of a topic, you can dig into the full library of video walk-through tutorials on the Adobe Creative Cloud Photography site (also free). The Learn to Create catalog currently has 10 tutorial videos. Of these, 5 begin with concepts such as "facial rendering" and "digital darkroom techniques." They then break down the topic into 10 posts, that range between 5 and 20 minutes in length. These articles, which cover topics such as the fundamentals of image preparation, anatomy, and basic Photoshop techniques, will help you put all the pieces together to create a beautiful image. In the past, I created a series of tutorials in the same format, one for each photo editing program I covered. With Learn to Create, I tried a new approach by using Photoshop tutorials to help you get started with other parts of the Creative Cloud Photography site as well. This new platform comprises of 10 introductory tutorials. In addition to these tutorials, I will release a second set of tutorials over

the coming weeks. The second set will cover topics such as “creating canvas art,” “graphics composition,” and “digital darkroom techniques.”
